SUMMARY

A skilled software engineer with 4+ years of experience. Passionate about creating intuitive and visually stunning user interfaces, dedicated to delivering high-quality and performant code. Strong understanding of React.js, Next.js, Redox, JavaScript, HTML5, CSS3, and Tailwind CSS. Experienced in designing and implementing responsive, dynamic, and interactive user experiences.

EDUCATION

Bachelor of Computer Science, Sir Syed University of Engineering and Technology 2022 BSCS | *CGPA: 3.52/4*

SKILLS

Technical Skills: React.js, Next.js (12, 13 and 14), Tailwind CSS, Redox Toolkit, Firebase, Node.js, JavaScript (ES6+), Typescript HTML5, CSS3 Node.js, SQL, Material UI, Chakra UI, Shadcn, Axios.

Soft Skills: Communication, Teamwork, Problem-solving, Adaptability

EXPERIENCE

Software Engineer (React.js/Next.js Developer) *Oct 2024 - (Present)*
Technyx Systems *Karachi*

- **Developing Features:** Building and maintaining functionalities for [PractiCal](#), including meal plan creation, subscription management, and pausing dates between meals.
- **JavaScript Expertise:** Implementing complex logic, ensuring seamless API integrations, and optimizing code for scalability and maintainability
- **Next.js Development:** Leveraging Next.js 12, 13, and 14 for front-end and server-side rendering to create efficient and responsive web experiences
- **Product Maintenance:** Identifying areas for improvement, implementing new features, and ensuring smooth deployment and performance of the PractiCal platform

- From scratch development of products like EMR, EHR and Patient Monitoring system. Developing and maintaining web applications using Typescript, React.js, Redux Toolkit and Next.js. Build reusable components and libraries.
- Implementing responsive designs that work across multiple devices and browsers. Writing high-quality, scalable, and maintainable code.
- Ensuring the application is optimized for maximum speed and scalability. Met with stakeholders, product teams and customers throughout system development lifecycle.
- Designed user-friendly software interfaces to simplify overall management. Conducted full lifecycle software development from planning to deployment and maintenance.
- Ensured HIPAA compliance, safeguarding patient data and privacy.

Web Developer

May 2021 – April 2022

Self-Employment

- Created custom e-commerce solutions using React for local clients.
- Developed portfolio websites, emphasizing design and functionality.
- Implemented interactive features, optimized performance, and ensured cross-browser compatibility.

PROJECTS

Electronic health record (EHR)

- Implemented robust **user management solutions**, including **user authentication**, **role-based access control**, and **user profile management**, ensuring data security and personalized user experiences.
- Streamlined **Patient information management** and system configuration.
- Optimized **appointment scheduling** for improved workflow.
- Implemented comprehensive **permission management** across the application, ensuring **secure access control** and **regulatory compliance**

Revenue Cycle Management (RCM)

- Designed and implemented user-friendly interfaces using **ReactJS** to enhance the accessibility and functionality of logistics and storage services for businesses.
- Developed and optimized **Claim**, **Provider**, **Facility**, **Patient Payment**, and **Batch** Modules in RCM.
- Collaborated closely with the design and backend teams to integrate frontend components seamlessly into the overall application architecture.

- Enhanced frontend usability and performance to optimize asset tracking and reporting functionalities, improving overall asset management efficiency.

Committee App [Visit Website here](#)

Developed a comprehensive Committee Management Application to streamline committee creation, registration, and member management. Key features include:

- Dynamic committee creation and member registration with approval workflow.
- Real-time committee announcements, including randomized member ranking.
- JWT-based user authentication with distinct roles (Committee Organizer, Member).
- Built with Next.js (versions 12, 13, and 14), Node.js, Express, Mongoose, and MongoDB.

Volton Solar Website [Visit Website here](#)

Developed a dynamic e-commerce platform for Volton Solar, consisting of a **user-facing website** and a **secure admin panel**.

User-End and Admin Features:

- Browsing and purchasing solar products (solar panels, inverters, batteries).
- Cart management and checkout process to WhatsApp with responsive design for all devices. □ User authentication for personalized experience and order tracking.
- Product, order, and user management.
- Admin authentication and role-based access.

CERTIFICATIONS

Web and Mobile Hybrid App Development, SMIT - Saylani 2021 Completed certification in building web and mobile applications from scratch using technologies like HTML, CSS, JavaScript, React, React Native, GitHub, and Firebase.

98-383: MTA: Introduction to Programming using HTML and CSS, Microsoft 2021 Microsoft certification earned through comprehensive training and successful completion of the exam, demonstrating proficiency in HTML and CSS fundamentals.

Python Development, SMIT – Saylani

2022

ACHIEVEMENTS

-
- **Ignite Funding:** Obtained funding from IGNITE for FYP with a COVID-19 use case.
 - **DUHS-DICE Exhibition Pakistan:** Presented FYP, receiving positive feedback and appreciation
